 The attachment of pipes, especially under the ceiling, often requires the use of two hands. It is then convenient, if the OPTIMAL latching fastener can be closed with only one hand. After closing the latch, the pipe is safely held in place but remains free to move. Consequently, adjustment of pipe can be made with two hands.

And don't forget: high security due to the positive-fit edge hook-in opening.

OPTIMAL
galvanised, in polybox
