

Angle brackets

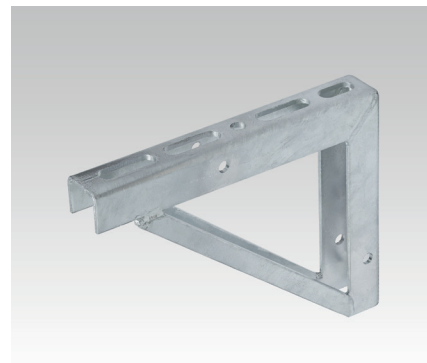

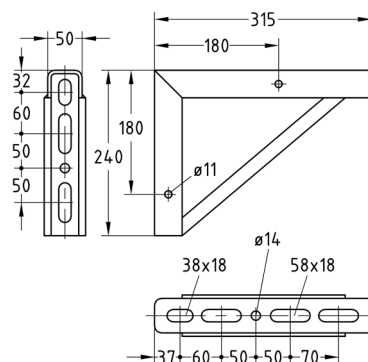

heavy-duty version, hot-dip galvanised

Field of application

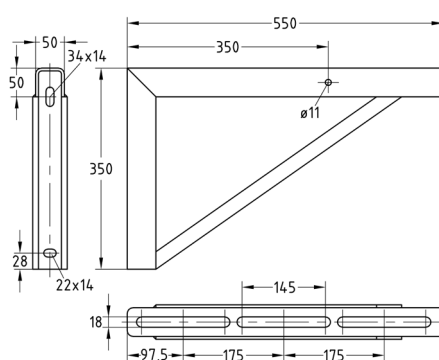

- Installation of pipelines on the wall and ceiling
- For the assembly of fittings and devices
- Suitable for indoor and outdoor use

Advantages

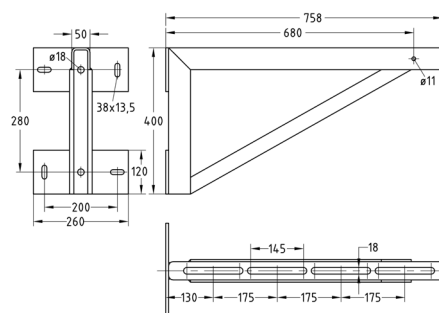

- Particularly stable version for heavy pipelines and aggregates
- Slotted holes for a flexible positioning of the loads
- Flexible adaptation to structural requirements due to different lengths
- Round holes in the side of the U-profile for additional braces, e.g. at fixed points
