FDD

Construction brackets

galvanised

Field of application

Ideal connecting element for the construction of cross-beams, frames and shelving systems

Advantages

- Great variety of mounting possibilities when used with MPC- and MPR-Support channels
- Provides solid joint and angle connections
- Any arrangement of channel opening possible
- For direct mounting on ceilings, walls and floors or for installation with MPC- and MPR-Support channels as:
 - Angular support brackets
 - Angular load-bearing brackets
 - Floor supports
 - Junction brackets
 - Cross connections
 - Transverse support angles
 - Connection element
